Introduction

The lesson exemplars for English Language Learners (ELLs)/Multilingual Language Learners (MLLs) in Grades 3-9 demonstrate ways to support these students in mastering the English language arts lessons listed in the table below developed by Core Knowledge, Expeditionary Learning and Public Consulting Group for EngageNY. There are links to the original EngageNY lessons in each lesson exemplar.

Attaining Core Competencies for English Language Learners

The supports used in the lesson exemplars are based on the Attaining Core Competencies for English Language Learners (ACCELL) model that is described in the Overview to the Resources. ACCELL is an evidence-based model developed by AIR specialists to support ELLs/MLLs in mastering core grade-level content delivered in English. The ACCELL supports used in these lessons are specifically focused on English language arts.

Conventions

The conventions that follow describe how the AIR supports have been superimposed on these lessons. An example of these supports is provided in the Overview to the Resources.

AIR has added additional supports to almost all existing lesson components. These are labeled AIR additional supports. However, in some instances AIR has added new activities as well. AIR

© 2018 New York State Education Department   Introduction: Scaffolding ELA Instruction for ELLs grades 3-9–1
new activity refers to an activity not in the original lesson that AIR has inserted into the original lesson. For example, Background Knowledge (AIR New Activity 2 for Work Time) is a new activity AIR has added to the Work Time component of the Expeditionary Learning lesson. Because it is the second AIR new activity associated with Work Time, it is labeled activity 2. If there is only one new activity associated with a component of the original lesson, it is not numbered. AIR instructions for teachers are instructions AIR has added that describe how a teacher might implement the activity. AIR instructions for students are instructions AIR has added for students. In some instances AIR has added student activities that accompany the instructions for students.

The AIR additional supports and AIR instructions for teachers are highlighted in gray to differentiate them from AIR instructions for students and AIR student activities. The latter have no highlighting. The lessons are formatted so teachers can create student materials by deleting all the rows in the lesson plans except AIR instructions for students and the student activities that follow this row.
ABOUT AMERICAN INSTITUTES FOR RESEARCH

Established in 1946, with headquarters in Washington, D.C., American Institutes for Research (AIR) is an independent, nonpartisan, not-for-profit organization that conducts behavioral and social science research and delivers technical assistance both domestically and internationally. As one of the largest behavioral and social science research organizations in the world, AIR is committed to empowering communities and institutions with innovative solutions to the most critical challenges in education, health, workforce, and international development.
